

## 2-day Agile for Lean Six Sigma Practitioners

The 2-day Agile for Lean Six Sigma Practitioners programme provides a route for existing Lean Six Sigma Deployment Leaders, Yellow, Green or Black Belts to learn Agile techniques and how they can be applied to Continuous Improvement initiatives to accelerate results and make projects more impactful. Additionally, the programme is ideal for people involved in Digital Transformation to learn how Agile techniques can facilitate executing Lean Six Sigma and Digital Transformation projects in concert using a common and consistent framework; whether the solution is process improvement, digital, or a combination, we can manage using a coherent planning approach.

**Perfect for deployment leaders, Yellow, Green and Black Belts, and Digital Transformation leaders who want to learn more about Agile, and how to apply it to improvement and business transformation projects.**

### Is this the right course for me?

- You would like to get a grounding in Agile practices and learn how to apply them in your workplace
- Your business improvement projects are taking too long and you would like to learn how Agile can speed things up
- You are hearing a lot about Agile in your business and want to learn what it is all about
- You have seen the benefits Agile techniques have brought to Digital Transformation and want to learn how you can institute the same business value-driven mindset on your Continuous Improvement projects
- Your Digital Transformation and Business Improvement projects are happening separately in silos and you want to learn how to use a common framework to deliver your organisation's strategic initiatives
- You know very little about Agile apart from it being a buzz word and feel like you are falling behind

### Key Learning Outcomes

#### Outcomes for your business:

Delegates are equipped to use Kanban and/or Scrum to deliver customer service and quality improvements, business efficiency, and productivity improvements more effectively using a business value-driven mindset; delivering early and maximising the value of the work being done.

#### Outcomes for personal development:

Become one of the hottest properties in town by enhancing your existing Lean Six Sigma expertise with state-of-the-art planning and execution techniques.

#### What's Included:

- Printed copies of the Slides

- Agile Pocket Guide and Managing Change Pocket Guide
- Online Access to:
  - PDF copies of the training manual
  - Downloadable tools and templates
  - Supplementary reference guides to support your projects

## Here is some of the feedback we have received so far:

*“These improvements would have taken at least 6 months to get approved and implemented previously. I’ve never got this done this quickly before”*

Lucy Ginger Essex CC

*“We were interested in speeding up project delivery as initial projects were taking longer than expected... ..that was our original thinking, but the course has given us an awful lot more, particularly at acknowledging the deliverables...”*

Delegates from the Improvement Team, Electricity Supply Board

*“Blending them together (Agile and Lean Six Sigma) can give you greater benefit. The key differences are that we have been able to work at a more rapid pace. The predictability of what we can achieve in sprints have been greater. We have seen benefits such as our cycle time, more togetherness in our teams and more shared ownership. It adds to the toolkit we have the in the Lean Six Sigma experience. It works very well”*

Wayne Fisher, SKY

*“Many thanks for the excellent Agile course you put together and hosted...extremely useful and we are already talking about how we can adopt some of the concepts we learnt into our project management activities.”*

*“Thanks for a really good two days. Now to do something with it!”*

*“You will be pleased to hear that we have started to put some of our learnings into practical use. We have two small teams that are currently planning their next sprints. As a result, we have been sharing some of our new knowledge with them and they are testing out some of the techniques.”*

*“Thank you for the excellent training”*

*“We have already bought into the Agile piece, which was a fantastic session”*

*“We have already started and completed our first sprint. We are finding the process very helpful”*
